

IN THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS

1. (Currently Amended) An open-type tray comprising:

a locking device installed at a corresponding portion of a housing and a door to selectively open/close the door installed at a front surface of the housing;

a connecting member formed at each of ~~both ends~~ opposite end of the door to receive a force that opens the door with the locking device released;

a rotary member ~~hinge-connected~~ hinged to the connecting member at ~~its~~ one end, ~~of which circular shaped teeth are having an arc shaped toothed portion~~ formed at the ~~other~~ another end, and rotatably installed at a side surface of the housing;

a resilient member that opens the door by moving the connecting member hinge connected to the rotary member by rotating the rotary member with a recovery force; and

a damper member, ~~of which~~ having a toothed circular shaped teeth that portion, the teeth of which engage with the teeth of the arc shaped toothed portion teeth formed at ~~the other end of the rotary member is formed at its periphery,~~ and set configured to be rotated with a uniform speed.

2. (Original) The open-type tray according to claim 1, further comprising a guide protrusion formed at one end of the connecting member in order to guide a moving path of the door moved by the damper member, and

a guide rail formed at a housing side surface to guide an insertion of the guide protrusion.

3. (Original) The open-type tray according to claim 1, wherein the resilient member is mounted at the rotary member at one end using a coil spring and fixed to the side surface of the housing at the other end to provide a rotational force to the connecting member by a resilient recovering force in the direction of opening the door.

4. (Original) The open-type tray according to claim 1, wherein a stopper protrudes from the outer surface of the housing to limit a rotation angle of the rotary member when the door is opened.
